***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Cushing on December 07, 2005.

The following changes have been made to the subject application:

In claim 1, line 4, "could be" has been changed to --is a candidate for being--.

In claim 1, line 7, "the potentially most powerful" has been changed to --said one--.

In claim 8, line 4, "could be" has been changed to --is a candidate for being--.

In claim 9, line 4, "could be" has been changed to --is a candidate for being--.

In claim 9, line 8, "the device performs the method of claim 1" has been deleted.

In claim 9, line 9, after "Raman laser", inserted --, the device performs a method for adjusting the relative output power of individual output wavelengths of the multi-output-wavelength Raman laser, the method comprising the steps of: suppressing the relative output power of said one output wavelength, adjusting the relative output power of the shortest output wavelength, adjusting the relative output power of further output wavelengths, and adjusting the relative output power of said one output wavelength--.

The Examiner's amendment has been made in order to clarify the claimed language and to place the application in a condition for allowance.

***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach a method/an apparatus for adjusting the relative output of individual output wavelengths of a multi-wavelength laser comprising steps of suppressing the relative output power of one output wavelength, adjusting the relative output power of the shortest output wavelength, the relative output power of further output wavelengths, and the relative output power of said one output wavelength as defined in claims 1, 8 and 9.

Therefore, claims 1-9 are presently allowed.

2. Any comments considered necessary by applicant must be submitted no latter than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Inquiry***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh Vo Dinh whose telephone number is (571) 272-1821. The examiner can normally be reached on Monday to Friday from 9:30AM to 6:00PM.
